

Customer Notice

September 18, 2009

To Our Valued Customers:

We are all aware of the influenza (flu) concerns that have been in the media since last winter. Although the H1N1 activity was mild in the spring, as we move into the fall/winter season we are being pro-active and initiating a program to address any concerns.

The most effective preventative measures are often some of the easiest to employ. We will be doing our best to support our customers and employees with disinfectant products and enhanced bus cleaning/disinfecting on a regular basis, and offering vaccinations to our employees.

As always, we will work to ensure that we are providing you with the cleanest environment possible while travelling with ACADEMY.

Thank you for your continued patronage
